

References guide –folding wagon with dripping bar

### Folding wagons with bottle dripping bar

Intravenous bottles are hung on the bar while goods are put on the double tables. These are the custom-design folding wagons requested by the hospital. When they are not in use, they are simply folded into 17 cm wide and stored at the corner of a room. Very smart design and convenient for a hospital short of spaces.

*Sit Smart  
&  
Wide open*
