

References guide: Flat-top heavy load capacity

### X-ray laboratory

These flat-top triple table wagons can bear 45kg per table, 135kg in total. Because the storage space next to the X-ray area does not have much room, the folding type is indispensable. Technicians put such items as Angiography kit and catheter.

### Folding tables, 45kg capacity each

Open dimensions: W933\*D505\*H958 mm

Folded dimensions: W933\*D200\*H1060

Weight: 25kg

Tables: triple tables type

Note. There are also double and quadruple tables types.
