

Tray/ Cabinet wagon

According to the requests by all departments in the hospital, those in charge receive the tools and the equipments, wash them, dry them, and check them up while disinfect them.

Tray/ Cabinet wagon holds name plates which identify every tool and kit and accompany them in the cleanup procedures, so as not slip into other departments' belongings.

The user was in favor of the model over others. One of the advantages they liked was large 125 mm diameter castors - very quiet & smooth in motion.
