

## Stacking tray/ cabinet units

Tokuyama stacking tray/ cabinet units were introduced for a better inventory control of medical kits and consumables.

\*features.

- 1). According to the floor spaces, the units expand or downsize easily.
- 2). Shallow and deep trays are interchangeable. The unit box may contain all 8 shallow trays, 4 deep trays, or some combinations of the two.
- 3). With the castor unit underneath the cabinet, they become mobile.
